

61% OF FATAL CRASHES INVOLVING LARGE TRUCKS OCCUR ON RURAL ROADS.

EVERY MILE. EVERY DAY.
DRIVE SAFE. — — — —

EDUCATE YOURSELF ABOUT DRIVING SAFELY AROUND TRUCKS.

WIDE TURNS

Trucks require extra turning room – they swing wide, or may even initiate a turn from a middle lane.

CAUTION

THIS VEHICLE MAKES WIDE RIGHT TURNS

BLIND SPOTS

A commercial driver has limited visibility on all four sides because of large blind spots around the front, back, and sides of the vehicle. Other drivers and road users should strive to stay out of these "No Zones".

LONGER TO STOP

A truck can weigh up to 80,000 pounds. That's 20 to 30 times the weight of a regular vehicle. Because of their weight, it takes trucks longer to stop. Be smart and don't cut off your bigger neighbors on the road!
